

# Decker Homes utilizes Owens Corning products to reduce energy costs

Decker Homes, a N.W. Ohio and S.E. Michigan home builder, and Owens Corning have joined together to showcase how affordable it is to reduce household energy costs by at least 50% **and work toward the goal of net zero energy homes.** Utilizing a portfolio of Owens Corning energy efficient insulation materials and their new Energy Complete Air Sealing System that work together with other energy saving home building products, ranging from low-E windows to the ultra-high efficient geothermal heating and cooling system to save home owners an estimated \$1,200.00 dollars a year and hundreds of thousands of dollars over the life of the home.

Decker homes is an innovative company seeking new products that increase energy efficiency without increasing costs. In 1998 Decker Homes committed to building 100% of its homes to Energy Star Certification and was the Green Energy Ohio business of the year in 2005. In 2008 Decker Homes joined as an inaugural year member of the U.S. Department of Energy Building America program with the goal of building net zero homes, homes that produce as much energy as they consume.

## Decker Homes: energy efficient from top to bottom.

Just like every other Decker Home, this home was built with the highest quality products and craftsmanship for the ultimate in comfort and energy efficiency.
